

HAYES SEWING MACHINE CO FACE MASK KIT INSTRUCTIONS

The Face Mask Kit includes:

- 2 Fat Quarters (Accent Fabric)
- 1/2 yard of white fabric (Lining Fabric)
- 1 spool of thread
- 5 yrds of 1/4 elastic

We recommend washing all fabrics before you start your sewing.

You will need:

- scissors or rotary cutter and mat
- ruler
- sewing machine
- iron
- pins or clips

Cut

- 1 – 9 inch X 6 inch rectangle of accent fabric (adult) or 7.5 inch X 5 inch (child)
- 1 – 9 inch X 6 inch rectangle of lining fabric (adult) or 7.5 inch X 5 inch (child)
- 2 – 7 inch pieces of 1/4 inch flat elastic (adult) or 5 1/2 inch (child).

Place one cut Accent fabric and one Lining Fabric right sides together with the elastic in place. The photo shows where the elastic is placed on each end. Pin to hold everything securely.

Using a 1/4 seam allowance, stitch all the way around leaving an about a two-inch opening along one of the short sides. Turn right side out through the opening and press. While pressing tuck in any fabric allowance from the opening. You should have a rectangle with your elastic on each end.

Lay the mask flat and make two (or three) pleats going lengthwise across the mask. A pleat is a small fold. Pin. (Just eyeball the placement.) Make sure the pleats are going in the same direction on each side.

Stitch all the way around the mask to close the opening and secure the elastic to complete the mask.
